UTA ID: 1002055616

1. Install the latest version of python.
2. Extract the project folder from the zip file, which includes four folders, one each for parts 1-4.
3. Open three terminals/command prompts and navigate to the project folder.
4. Each part contains three python files, one for TC, **TC.py**, and two for the participant nodes, **node1.py** and **node2.py**
5. For Part 1, navigate to the **Part1** folder in the terminal.
6. Execute the TC in one terminal using the following command:

```
python TC.py
```

7. Execute the other two nodes in the remaining two terminals, using the following commands respectively:

```
python node1.py
```

```
python node2.py
```

8. Repeat the same steps for the other three parts.
